

OnCommand® Connection Introduces FLEET HEALTH MONITORING

COOLANT

Monitor coolant level and temperature, prevent damage to engine and downstream aftertreatment components leading to extensive downtime.

EMISSIONS

Monitor important pressures, temperature and soot level, preventing avoidable tows and bills for forced system regens.

OIL

Monitor oil levels, pressures, and temperature to prevent engine damage and costly repairs.

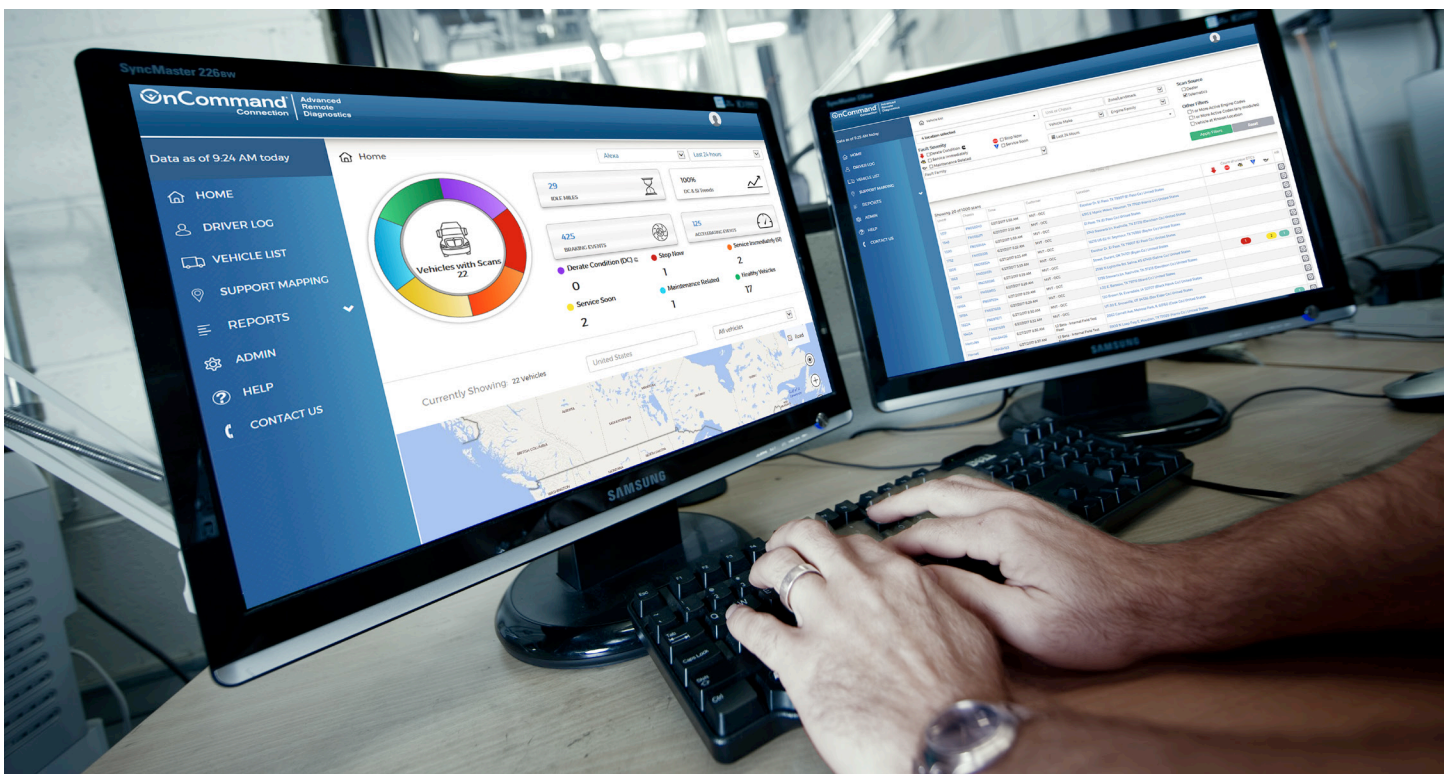

HEAD LAMPS

Monitor low/high beam outages to avoid reported out of service violations and roadside repair charges to resume operation.

Our expertise in predictive diagnostics and ability to monitor any make and model in your fleet lets you focus on keeping your business running. Our remote diagnostics tools spot high-priority maintenance issues and can even identify signs of trouble before it happens.

OnCommand Connection customers have seen up to 30% reductions in unscheduled repair costs and up to 80% reduction in towing events.
